

KNAUF INSULATION EXPERIENCE CENTER – WHERE BUSINESS MEETING BECOMES AN EXPERIENCE

1. BUSINESS EXPERIENCE IN THE KNAUF INSULATION EXPERIENCE CENTER (KIEXC)

The KIEXC is an excellent venue for various events and is special in many respects: an attractive location, the airport located nearby, good connections by road ... and the business meetings held here turn into an experience. You are welcome to experience them too.

An increasing number of clients trust us, because we adapt to them and respect their wishes, we stick to the agreements and offer affordable prices.

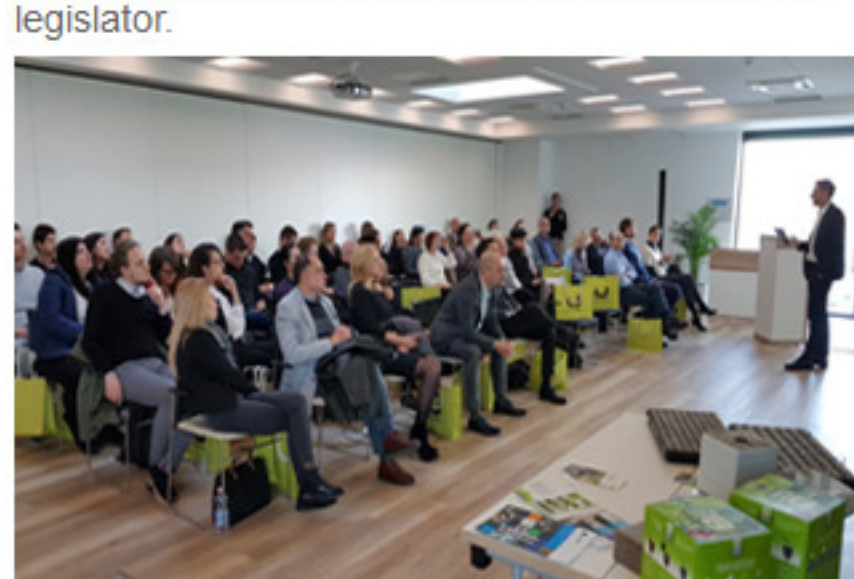

Here are just some of the events that have been held at the KIEXC this year:

Reception for architects - we shared our practical experience in sustainable construction with architects and representatives of the Faculty and legislator.

4BUILD forum "BIM in Practice" with Hermes solutions and Knauf Insulation

Innogrow Interreg Europe – we hosted representatives of the European project Regional policies for innovation driven competitiveness and growth of rural SMEs. They were impressed by our Center and its surroundings.

Let's be engineers! Representatives of 30 Slovenian companies and associations linked by the initiative "Let's be engineers" met in our Demonstration and Training Center.

A visit of Croatian students to the KIEXC was part of the Erasmus international exchange and was carried out in cooperation with the SkillIME Institute from Škofja Loka.

A meeting of the Central Marketing Team of Knauf Insulation – they proved to be excellent in the practical work on the exhibits.

2. CENTER OF SUSTAINABLE CONSTRUCTION

At BAU Munich on 16 January this year, the Knauf Insulation Experience Center received the highest-level Platinum DGNB Certificate.

The DGNB Certification System is based on the concept of holistic sustainability, placing equal emphasis on the environment, people and commercial viability, which is further linked to technical, process and location quality. It is used worldwide and is considered the most advanced sustainability scheme and a tool for ensuring building sustainability.

[Here you can see the percentage of points achieved in each quality category.](#)

3. HIGHLIGHTS AND NEWS

We want to show our target groups all about our insulating materials in the most experiential way: what they are made of, the insulation material use, purpose and installation, their advantages, etc. Learning is very fun and illustrative when virtual reality is included.

4. WHAT THEY SAID ABOUT US

«KIEXC - when you come knowing that it will be something creative and that you are always welcome. Because the place has been designed to spread open minds, develop a friendly atmosphere and the ambition of progress. Because you sense the innovation DNA and have a feeling that you are part of a global development story. All this and more - when you come to the KIEXC. We are there often.»

Edita Krajnovič, MSc
Cofounder of the Let's be engineers! project.

«We are extremely proud that Knauf Insulation is one of our founders as it is a leader in sustainable construction and it verifies its own development and results in practice. This is the only way a company can build trust among customers while at the same time it enhances its development, and improves the products and services. The members of the Centre of Energy Efficient Solutions were one of the first users of the KI Experience Center and I'm happy to say that the atmosphere at the events was exceptional. The light, acoustics and air of this venue have exceeded my expectations. We will be happy to organize many more meetings in the KI Experience Center.»

ANASTRUNA BREGAR
Director of the Centre of Energy Efficient Solutions
